

Hornøya - Lintujen valtaama saari

Vuoreija (Vardø)

Hornøyen lintusaari Vuoreijan kaupungin edustalla on lintubongareiden ja valokuvaajien suosiossa. Saarella riittää ihmeteltävää myös aivan tavalliselle turistille, on vaikea kuvitella niin suurta lintumäärää.

Saareen pääsee Vuoreijan satamasta. Edestakainen matka maksaa 400 NOK (2018) ja se kestää noin kymmenen minuuttia.

One of the most popular services the Port of Vardø offers is a boat trip to the most spectacular place in northern Norway. It is home to 100,000 seabirds, including the Arctic species, the Brunnick's Gull, and the Arctic Skuas. The island is the historic lighthouse. It is well worth the uphill walk to admire this amazing view from the island and the open ocean to the north and east. Hornøya is the easternmost point in Norway.

Hornøya and Reineya nature reserve is one of the most impressive nature spectacles in northern Norway. It is one of the last remaining seabird colonies in the Arctic. It is a nature experience that will leave a lasting impression. We would like to ask you to abide by the rules of the nature reserve. Please stay within the designated area, as shown on the map in green, during the boat trip.

Please stay on the marked path and do not attempt to climb the cliffs. Most importantly, please do not disturb the birds, so that others may also enjoy this amazing experience.

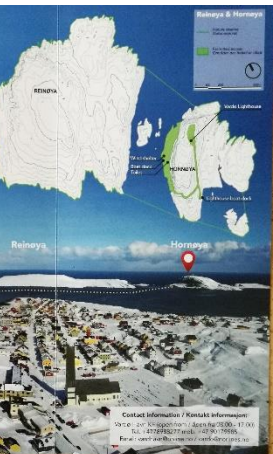

If you have any questions, please contact us at our office. We are happy to help you plan your trip. Our office is located at the Vardø office.
